### eCopy Connector for Canon® imageWARE™

#### Directly access Canon imageWARE™ from ShareScan enabled scanning devices

With the eCopy Connector for Canon imageWARE, hard copy documents are quickly converted into digital files to be stored in Canon's imageWARE Document Manager. Document indexing information (such as type and format) and any Canon imageWARE specific attributes are input at the Canon imageRUNNER device using an eCopy-enabled solution. Documents can be sent directly to the specified folder within Canon imageWARE for storage where it is immediately available for retrieval by authorized imageWARE users.

Now, Canon imageWARE users can easily include paper documents in their digital workflows and supporting document lifecycle management processes. The eCopy Connector for Canon imageWARE is directly integrated with Canon imageWARE functions, assuring customers that eCopy-created image files will be stored, indexed and managed consistent with their existing content management procedures.

The eCopy Connector for Canon imageWARE enables ShareScan users to scan paper documents into Canon imageWARE offering businesses a smarter way to increase operational efficiency while sustaining a competitive advantage.

Add required document indexing information at the copier just as you would back at your desktop, ensuring quick user adoption

After previewing the scanned document, users authenticate by selecting their Canon imageWARE or network username and password.

Right at the Canon imageRUNNER device, users have the ability to view their various cabinets and folders, create folders, and incorporate their paper documents into Canon imageWARE just as they would with electronic files at their PC.

After selecting the location, populate the index fields or use the defaults provided by imageWARE and store the document.
