DATASHEET

eCopy® Connector for Open Text Document Management™

Integrate paper documents into a digital content management system

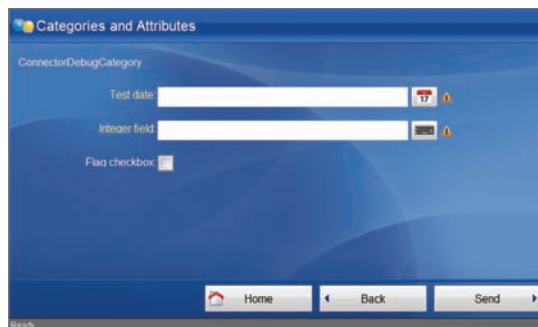

Using the eCopy Connector for Open Text Document Management, paper documents can be scanned at a digital copier or document scanner and sent to Open Text Document Management repositories for storage and ongoing document lifecycle management. The Connector is dynamically integrated with Open Text Document Management, assuring customers that eCopy-created image files will be indexed, stored, and managed consistent with their existing content management procedures.

The eCopy Connector for Open Text Document Management enables eCopy ShareScan® users to scan documents directly into Livelink ECM to ensure business content from across the enterprise is protected and kept in check with established internal policies as well as industry and regulatory compliance mandates.

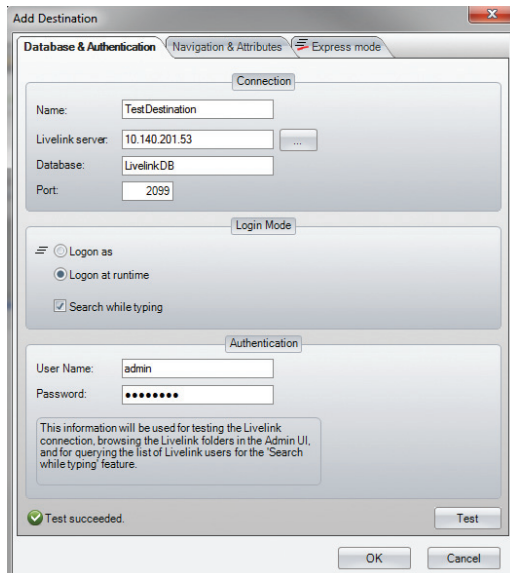

With the eCopy Connector for Open Text Document Management, hard copy documents are quickly converted into digital files to be stored in Open Text Document Management's highly scalable document repository. Document information (such as type and format) and any Open Text Document Management specific attributes are input at the digital copier or scanner using eCopy ShareScan. Documents can be sent directly to the specified location within Open Text Document Management for storage where it is immediately available for retrieval by authorized Open Text Document Management users.

FEATURES AND BENEFITS

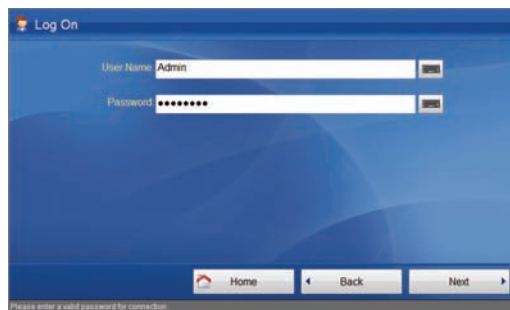

- Leverage existing Open Text Document Management investment
- Validate users at the device
 - Create an electronic audit trail
 - Conform to corporate security policies: *Sarbanes Oxley, HIPAA*
- Integrate dynamically with Open Text Document Management
 - Enable unique user permissions and preferences
 - Consistent user interface and workflow reduces training time
- Lower total cost of ownership
 - Server modifications automatically reflected at each device in real time
- Capture missing information
 - Add paper documents to your Open Text Document Management Document Management Process
- Profile documents completely from an eCopy-enabled device with minimal typing
- Improve workgroup collaboration
 - Easily retrieve electronic and paper documents from Open Text Document Management

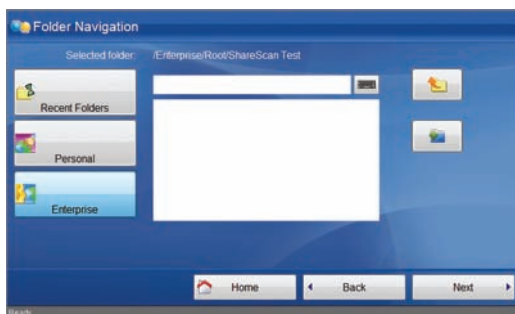

Add required document indexing information at the copier just as you would back at your desktop.

Initial installation and setup take only minutes to complete. Simply identify the Open Text Document Management, and choose what you want users to see at the copier or scanner.

Users are authenticated by entering their username and password while at the eCopy-enabled device, ensuring that no one distributes or stores scanned documents from a different user account.

The user views a unique interface based on their login information, displaying their workspaces, projects, folders, and short cuts.

DEVICE COMPATIBILITY

For the latest supported e-mail servers, document management systems, network fax servers, and cost recovery systems, please visit:
