DATASHEET

eCopy® Connector for Open Text Fax Server, RightFax Edition™

Fax with Open Text Fax Server (RightFax) from ShareScan enabled scanning devices

The eCopy Connector for Open Text Fax Server, RightFax Edition, allows the user to effortlessly fax paper documents directly from an eCopy-enabled scanning device. By converting paper documents into electronic copies, eCopy enables you to fax paper documents via the OpenText fax server for delivery to your recipient's fax machine. Users can authenticate to RightFax and send from their personal account with access to their personal fax address books from the RightFax server at the device, preview scanned images to ensure the quality and accuracy of the fax prior to sending, and send documents securely.

The eCopy Connector for Open Text Fax Server, RightFax Edition, enables eCopy ShareScan® users to securely scan documents directly to a RightFax server from an MFP or scanner, which dramatically reduces operating costs and solves interoperability problems with fax machines and VoIP networks by eliminating analog fax extensions, consolidating fax resources in a shared RightFax server and leveraging RightFax IP fax services.

The Open Text Fax Server, RightFax Edition, Connector supports data publishing when used in conjunction with the eCopy Forms Processing Extender or other custom / 3rd-party forms Extenders, allowing users to index files based on content extracted from their pages, further streamlining the scanning process. Workers spend even less time dealing with paper and data entry user errors are eliminated, ensuring greater accuracy and efficiency.

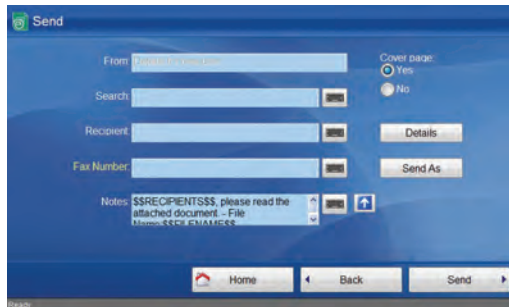

eCopy PaperWorks™ software, in addition to sending faxes, lets you retrieve inbound faxes for further manipulation, storage, and distribution right from your personal workstation. By seamlessly integrating with the Open Text fax server, anyone in your organization who has network access can receive, send, annotate, e-mail, and OCR faxes right at their desktop.

BENEFITS

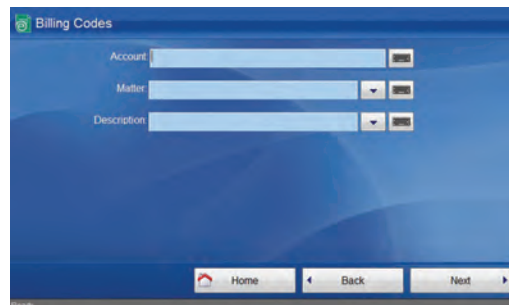

- Delegation support allows users to name delegates who can send faxes, as them, on their behalf
- Maximize the ROI of your IT investments
- Provide greater control over company assets
- Consolidate IT investments with Open Text server
- Provide one point of control for both electronic and hard copy fax applications
- Scalable solutions for small workgroups or global enterprises
- Capture electronic copies of your paper faxes; create audit trails
- No redundant maintenance of fax address books

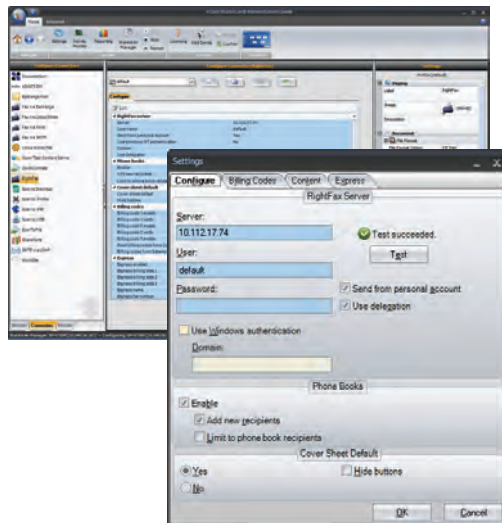

Choose the RightFax button from the user friendly interface on the eCopy ShareScan touch panel.

Select recipients from the RightFax address books directly at the capture device or enter new contact information and save to your personal address book. Adding or selecting subject notes and cover pages allow faxes to be sent quickly.

End users can add and verify billing code information at the scanning device as they would at their desktop, ensuring accurate and appropriate billing and reporting of outgoing faxes.

Easy configuration allows the administrator to configure the Connector settings ranging from the authentication to address book and billing code options. Additionally, the Connector can be configured to read billing codes directly from third party Cost Recovery applications to streamline the user experience.

DEVICE COMPATIBILITY

For the latest supported e-mail servers, document management systems, network fax servers, and cost recovery systems, please visit: <http://connectors.ecopy.com/Software-Alliance-Partners>

For the latest supported platforms for eCopy ShareScan, please visit: <http://www.ecopy.com/support/platforms.htm>

System Requirements

- eCopy ShareScan® v5.0 or higher
- Open Text Fax Server (RightFax) 8.5 or higher
